

XC-TurnTable

The X-CT TurnTable transforms the ritual of listening into a sculptural experience, seamlessly integrating a turntable, vinyl storage, and album display within a monolithic mirror-polished stainless steel coffee table. A recessed turntable sits flush within the surface, while a dedicated slot presents the record currently playing, allowing its artwork to become part of the object itself. Integrated vinyl storage within the table's legs keeps a curated collection on display and within easy reach, balancing everyday functionality with a clean, architectural silhouette. The table is available with a Technics SL-1200 turntable or can be configured to accommodate the client's own.
